

# VISTA VARIFOCAL

## RANGE OF PROFESSIONAL LENSES

Selection of  
Varifocal lenses

### IDEAL FOR APPLICATIONS SUCH AS:

- Prestigious new buildings
- Flagship retail stores
- Blue chip offices

### MAIN FEATURES:

- 1/3" and 1/2" formats
- CS mount
- Auto iris, Direct drive and Manual iris options
- All lenses are colour corrected
- Locking screws on both zoom and focus
- Varifocal ability allows mounting of camera in preferred areas

### FOR SUPERB PICTURE BOTH INDOORS AND OUTDOORS

Varifocal lenses enable you to select the exact focal length (field of view) that you require for the specific location and within the specified focal range of the lens.

These give the flexibility of allowing the installer to mount the camera where it is most convenient, rather than being dictated to by the availability of the standard lens sizes.

With all Varifocal lenses where you are able to adjust the focal length, you will always need to adjust the focus to ensure a sharp crisp picture. The Vista range offers a choice of varifocal lenses from 2:1 to a 10:1 zoom ratio that can be used wherever a normal lens would be installed.

Varifocal lenses are ideal for all projects, ensuring the correct field of view is seen every time.
